5 Things to Know about the WELL Building Standard

A New Focus on Occupant Health and Wellness

While LEED certification targets a building's environmental performance and sustainable design, WELL focuses on the health and well-being of the building's occupants through architecture and design. [Look at these examples....](#)

Google Balloons

Bringing Connectivity to Storm-torn PR

Project Loon, led by Google's parent company Alphabet, has been granted an experimental license by the FCC to help provide emergency cellular service to Puerto Rico. The result of a "loony idea," the network of balloons can deliver internet connectivity in otherwise under-served areas.

[How do Loon balloons work?](#)

WASTE

The World's First

Cradle-to-Cradle T-shirt

C&A, the international Dutch chain of retail clothing stores, launched a line of t-shirts that are certifiably "cradle to cradle." They were designed and manufactured in a way that is benign to the environment and human health, and their materials can be recirculated safely back into industrial materials or composted into the soil.

[See the future of manufacturing.](#)

5 Smart Building Benefits

Lower Costs, Save Time, Feel Happy

A smart building can offer substantial benefits, including lower costs, saved time and a greater sense of comfort and ease for employees. Technologies once considered revolutionary are steadily becoming the norm. These five examples of web-enabled smart-building features can make a big impact on your office environment.
